

Machine Tools

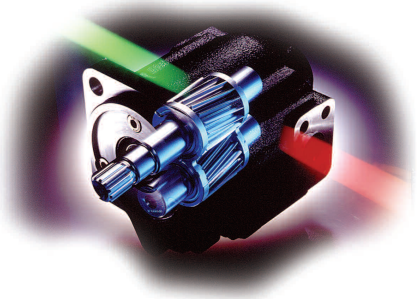

Russell Ductile Castings has considerable expertise in the production of castings for a wide range of advanced CNC machine tools and automated grinding machinery. These high quality machines perform complex operations on both metal and high quality glass, as well as performing optical polishing operations to exacting tolerances.

Castings of up to 3000 kilos are produced and cover a variety of uses within the machine tool, ranging from bearing housings, tables and pallets, hydrostatic slide ways through to large wheel heads and machine bases. Castings are produced to tight tolerances, supplied direct to our customers in either the as cast or we can deliver fully machined components direct to build lines.

Our key partners within this market sector, are Mazak and Landis Lund, Lapmaster International.

Certification & Accreditations

ISO 9001:2000

Mazak Approved Supplier.

Landis Lund Approved Supplier.

Lapmaster International Approved Supplier.
